4. Valuation basis

- (1) The conventional immediate and deferred annuity business is valued by discounting future benefit payments and maintenance expenses

The mathematical reserve for RPI-linked annuities is determined with an explicit allowance of 3% for future increases in annuity payments, which is consistent with the treatment of the matching assets. The treatment of RPI-linked annuities which are subject to maximum and minimum percentage annual increases is described in 5 (4) below.

- (2) The following table gives the valuation interest rates at the end of 2008 compared with those at the end of 2007. Non-linked and index-linked liabilities are backed by different assets and hence have different valuation interest rates. Index linked yields are real yields.

| Product Group | Valuation interest rates | |

| | 2008 % | 2007 % |

- (3) In accordance with INSPRU 3.1.41R, a prudent adjustment, excluding that part of the yield estimated to represent compensation for the risk that the income from the asset might not be maintained or that capital repayments might not be received as they fall due, was made to the yield on assets.

This adjustment took account of:

- (a) Market margins of gross yield over the yields of risk-free investments of a similar term in the same currency, where available
- (b) The reasonableness of the net of adjustment yields over the yields of risk-free investments of a similar term in the same currency, taking account of the points above
- (c) The future outlook for bad debt experience.
- (d) The historic experience of bad debts for each of the major fixed interest asset classes
- (e) The need to take a prudent view of the above.

The deductions for bad debts were:

| | 31/12/2008 | 31/12/2007 |
|---|-------------------|-------------------|
| Commercial mortgages (NUMF) | 0.50% | 0.50% |

| Corporate Bonds – unrated | 0.67% | 0.67% |
| Private placements | <i>See Note</i> | <i>See Note</i> |
| Swaps | 0.00% | 0.00% |

Note: Rating-specific deductions were applied to private placements in line with the corporate bond deductions in the above table.

The valuation rate of interest used is net of a deduction of 0.08% which provides a prudent margin for cash flow reinvestment and disinvestment risk.

An additional deduction was made to the valuation rate of interest in respect of short-term commercial mortgage defaults. This has the impact of increasing reserves by £250m.

- (4) Except for Bulk Purchase Annuities, mortality is based on UK standard published tables with prudent allowance for current experience, and adjustments for improving longevity. For Bulk Purchase Annuities, mortality for pensions in payment is based upon “NUA Model C” mortality with prudent allowance for current experience, and adjustments for improving longevity. The policyholders predominantly reside in the country of operation, except for business written in the Minor Sterling category.

The 2008 mortality basis is largely unchanged from the 2007 mortality basis for the majority of NUA annuity business. The only change for the NUA (excluding Provident Mutual originated business and Bulk Purchase Annuity business) base tables was to reduce by three percentage points the margins for adverse deviations.

Two swaps provide fixed interest cash flows in exchange for RPI linked cash flows from two corporate bond assets used to back long-term fixed interest liabilities.

The company holds currency swaps to hedge the risk of currency movements on corporate bonds denominated in US dollars backing liabilities denominated in Sterling.

An inflation swap is held to hedge the risk of inflation arising from RPI and LPI linked Bulk Purchase Annuity liabilities, backed by fixed interest corporate bonds.

Credit default swaps are held to provide exposure to credit markets until cash from new premiums is invested in suitable assets.

A long gilt future is held to provide exposure to gilt markets until cash from new premiums is invested in suitable assets.

The valuation interest rate used to determine the value of long-term index linked liabilities is derived from the rate of interest which equates the discounted value of aggregate cash flows, including cash flows arising from each of the swaps, with the total market value of the asset portfolio, including the market value of each of the swap.

Supplementary note 0204 gives details of the valuation interest rate approach.

- (12) There is no impact on mathematical reserves arising from changes in the INSPRU valuation rules effective from 31 December 2006.

5. Options and Guarantees

- (1) Not applicable.
- (2) For the G Plus Bond deferred annuity a guaranteed cash option is available in lieu of an annuity and the reserve is held for this option.
- (3) A reserve of £4.5m is held in respect of the guaranteed insurability option that exists on one bulk purchase annuity scheme. This option allows new member pensions to be placed with NUA over the next five years on guaranteed mortality assumptions, up to a limit of £200m.

The reserve held is 2.5% of the outstanding limit in respect of this guarantee. This outstanding limit was £177m at end December 2008, which resulted in the reserve of £4.5m.

- (4) Some RPI-linked annuities are subject to maximum and minimum percentage increases. For valuation purposes these are treated as being identical to normal RPI-linked annuities.

There are no other guarantees with any value.

6. Expense Reserves

- (1) Based on the non-linked business in force at 31 December 2008, the explicit allowance for maintenance expenses during 2009 is £10.7m and the implicit allowance for investment expenses, in the valuation rate of interest, during 2009 is £8.7m. All expenses have been treated as attributable.
- (2) The implicit allowance for investment expenses was estimated by applying the investment expense deductions by asset class assumed in the valuation interest rate calculation to the assets allocated to the valuation liabilities.
- (3) The maintenance expenses in line 14 of Form 43 are £24.1m. This compares with the total of £19.4m from 6(1). In 2008 the Management Services Agreement between Norwich Union Life Services Limited and Norwich Union Annuity Limited was renegotiated. The new Agreement has resulted in lower maintenance expenses charged to Norwich Union Annuity Limited for 2009 onwards, hence the significant difference.
- (4) The costs of acquiring new business assumed in the next twelve months would have little impact on the Company and would be charged to the new business written.

- (5) An assessment was made of the cost of closure of the Company to new business at the end of 2008 and a reserve for £14.8m, corresponding to the full cost, was established on Form 51.
- (6) There are no expenses which have been treated as non-attributable.

7. Mismatching Reserves

- (1) Mathematical reserves for overseas business as reported in Forms 51 and 54 are all in respect of sterling liabilities and are fully matched by sterling assets.
- (2) Not applicable.
- (3) There are no significant liabilities in currencies different to the matching assets.
- (4) Two tests were applied at December 2008, in line with INSPRU 3.1.16R
 - (a) a rise in risk free interest yields for all outstanding terms of 20% of the long term gilt yield accompanied by a fall in property values of 20%
 - (b) a fall in risk free interest yields for all outstanding terms of 20% of the long term gilt yield accompanied by a fall in property values of 20%

For those fixed interest securities that are not risk free, we assume the yield differential to risk free does not reduce in a resilience test.

The most onerous scenario as at 31 December 2008 was test (a).

- (5) There are no investments outside of the United Kingdom at 31 December 2008 for the purposes of calculating the resilience capital requirement.
- (6) The assets and liabilities have been revalued on this interest basis.
 - (a) The calculations have led to a resilience capital requirement of £66.5m.
 - (b) The aggregate value of liabilities has decreased by £1,178.0m
 - (c) The aggregate value of assets has decreased by £1,244.6m
- (7) The valuation liabilities include an allowance of a 0.08% deduction from the valuation interest rate for duration mismatch as mentioned in section 4(3). No further reserve is required to satisfy INSPRU 1.1.34R.

8. Additional Special Reserves

An additional reserve to cover potential data quality issues is established at a level of 0.15% of the reserve for future annuity payments and expenses.

An additional reserve of £300m in respect of short-term corporate bond defaults has been established to protect against the significant widening of credit spreads in corporate bond markets.

9. Reinsurance

- (1) The Company has no facultative reinsurance with a reinsurer who is not authorised to carry out business in the United Kingdom.
- (2) There were 7 reinsurance treaties with external reinsurers where the Company was the ceding insurer and under which business was in force at the valuation date.

The following summarises investment policy for the use of derivatives: -

- Derivatives will only be used in accordance with FSA Guidelines for the purpose of efficient portfolio management or reduction in investment risk.
- Derivatives must not be used for speculative purposes.
- Derivatives must be fully covered by the assets of the fund and must not be used to 'gear up' a fund.

The speculative use of derivative contracts is prohibited.

Financial year ended **31st December 2008**

We have examined the following documents prepared by the insurer pursuant to the Accounts and Statements Rules set out in Chapter 9 of IPRU(INS) the Interim Prudential Sourcebook for Insurers, GENPRU the General Prudential Sourcebook and the INSPRU Prudential Sourcebook for Insurers ("the Rules") made by the Financial Services Authority under section 138 of the Financial Services and Markets Act 2000 ("the Act").

- Forms 2, 3, 13 to 17, 40 to 43, 48, 49, 56, 58 and 60 (including the supplementary notes) ("the Forms");
- the statement required by rule 9.29 ("the statement"); and
- the report required by rule 9.31(a) ("the valuation report").

We are not required to examine and do not express an opinion on the following:

- a) Forms 46, 47, 50, 51, 54 and 57 (including the supplementary notes);
- b) the statement required by rule 9.30; and
- c) the certificate signed in accordance with rule 9.34(1).

This report is made solely to the insurer's directors, in accordance with rule IPRU(INS) 9.35. Our examination has been undertaken so that we might state to the insurer's directors those matters we are required by the Rules to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the insurer for our examination, for this report, or for the opinions we have formed.

Respective responsibilities of the insurer and its auditors

The insurer is responsible for the preparation of an annual return (including the Forms, the statement and the valuation report) under the provisions of the Rules. The requirements of the Rules have been modified by the direction issued under section 148 of the Act on 30 September 2006 referred to in supplementary note 0204. Under rule IPRU(INS) 9.11 the Forms, the statement and the valuation report are required to be prepared in the manner specified by the Rules and to state fairly the information provided on the basis required by the Rules. The methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation report prepared in accordance with rule IPRU(INS) 9.31(a) are required to reflect appropriately the requirements of INSPRU 1.2.

It is our responsibility to form an independent opinion as to whether the Forms, the statement and the valuation report meet these requirements, and to report our opinion to you. We also report to you if, in our opinion, the insurer has not kept proper accounting records or if we have not received all the information we require for our examination.

Basis of opinion

We conducted our work in accordance with Practice Note 20 "The audit of insurers in the United Kingdom (revised)" issued by the Auditing Practices Board. Our work included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Forms, the statement and the valuation report. The evidence included that previously obtained by us relating to the audit of the financial statements of the insurer for the financial year on which we reported on 31 March 2009. It also included an assessment of the significant estimates and judgements made by the insurer in the preparation of the Forms, the statement and the valuation report.

We planned and performed our work so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Forms, the statement and the valuation report are free from material misstatement, whether caused by fraud or other irregularity or error, and comply with rule IPRU(INS) 9.11.

In accordance with rule IPRU(INS) 9.35(1A), to the extent that any document, Form, statement, analysis or report to be audited under rule IPRU(INS) 9.35(1) contains amounts or information abstracted from the actuarial investigation performed pursuant to rule IPRU(INS) 9.4, we have obtained and paid due regard to advice from a suitably qualified actuary who is independent of the insurer.
