Derivative Contracts

The following summarises investment policy for the use of derivatives:

a) Derivatives will only be used in accordance with guidelines issued by the Prudential Regulation Authority for the purpose of efficient portfolio management or reduction in investment risk. They must not be used for speculative purposes, must be fully covered by the assets of the fund and must not be used to "gear up" a fund.

Futures may be used to implement asset allocation decisions, where this is more efficient than trading in the underlying securities or would avoid disruption to asset allocation strategies.

Forward foreign exchange contracts may be used to manage the impact of currency fluctuations on the balance sheet and to hedge cash flows. No forward foreign exchange contracts were entered into during the year.

Transactions in financial options may only be undertaken with the prior approval of the Group Derivatives Committee. Their use is limited to balance sheet risk reduction, including the management of the solvency capital surplus. No financial options were entered into during the year.

Except for foreign exchange swaps (referred above), swaps may only be undertaken following the prior approval of the Group Derivatives Committee. Their use is limited to balance sheet risk reduction. No swaps were entered into during the year.

b) There are no specific guidelines for the use of contracts that were not reasonably likely to be exercised at the start of the contract. The speculative use of derivative contracts is prohibited.

c) The Company was not party to any stock underwriting over the financial year, or any other arrangements, which fall into description b) above. Therefore the end of year exposure was nil.

d) No derivative contracts were held during the financial year, which required a significant provision to be made for them under INSPRU 3.2.17R.

e) During the financial year the Company granted no rights under derivative contracts for a fixed consideration.

It is the Company's policy to review all its reinsurance contracts to ensure that they meet the criteria under International Financial Reporting Standard 4 to be classified as insurance contracts.

In carrying out that review the Company has determined that these criteria have been met and there are no contracts where:-

- a) the value placed on future payments in respect of the contract in the return for the financial year is not commensurate with the economic value provided by that contract, after taking account of the level of risk transferred; or
- b) there are terms or foreseeable contingencies (other than the insured event) that have the potential to affect materially the value placed on the contract in the insurer's balance sheet at, or any time after, the end of the financial year.

***1305* Counterparty Limits**

The Company's management of credit risk is carried out in accordance with the Aviva Group credit risk framework, which includes setting exposure limits and monitoring exposures in accordance with ratings set by credit ratings agencies such as Standard & Poor's. Financial assets are graded according to current credit ratings issued. A credit limit for each counterparty is set based on default probabilities that are in turn based on the rating of the counterparty and the type and duration of exposure concerned. Exposure levels are reported to, and reviewed by, the Aviva Insurance Limited ("AIL") Asset Liability Committee monthly and reported to the AIL Board via the Capital and Liquidity Report quarterly. Additional oversight is provided by Group ALM. Where exposures approach or exceed credit limits, these are reviewed with alternate actions considered. In some circumstances breach positions are risk accepted, in these cases the position is reviewed at least annually. These limits are managed at a Business Unit level hence the Company's exposure is aggregated with other UK&I GI exposures.

The Aviva Group credit risk framework also incorporates the management of exposure to reinsurance counterparties, including actual and contingent reinsurance exposure. Reinsurance exposures are monitored at an Aviva Group level as most reinsurance programmes are placed on a Group-wide basis. The Company has a significant exposure to its parent company, AIL, arising from a quota share reinsurance agreement entered into originally in 2006 by Aviva International Insurance Limited, and transferred to AIL in 2011.

***1501* Provision for Reasonably Foreseeable Adverse Variations**

No adjustment or provision is required in respect of a provision for reasonably foreseeable adverse variations pursuant to GENPRU 1.3.30R to 1.3.33R or INSPRU 3.2.17R to 3.2.18R. Management has considered current market conditions when valuing investments in accordance with IFRS. All derivative contracts are strictly covered and all other obligations to deliver assets or make a payment were felt to be prudently provided for in the accounts.

***1502* Contingent Liabilities**

- a. There are no charges over the Company's assets.
- b. No provision has been included in Form 15 for any liabilities to tax on capital gains, which might arise if the Company disposed of its investments. The full potential liability for deferred tax not provided was £nil (2013 - £nil).
- c. There are no contingent liabilities in the Company.
- d. No guarantee, indemnity or other contractual commitment, effected other than in the ordinary course of insurance business, exists in respect of related companies.
- e. There are no fundamental uncertainties.

***1603* Other Income**

Line 21 of Form 16 principally represents domestic emergency cover collected on behalf of a third party, for which a profit element is retained.

In addition, the Company prepares its annual statutory financial statements in accordance with International Financial Reporting Standards (IFRS). Those financial statements do not include a claims equalisation reserve (CER) in liabilities but instead include a profit commission expense payable as a result of the release of the CER under IFRS. In 2013, the CER was £375k; in 2014 it is £365k, a decrease of £10k. Line 21 of Form 16 includes the increase in the commission expense of £10k to offset the decrease in CER. If the financial statements had been prepared in accordance with UK GAAP, there would be no adjustment in this line.

The Company entered into a quota share reinsurance arrangement with Aviva International Insurance Limited, with effect from 1 January 2006. On 14 November 2011, this contract was transferred to the Company's current parent company, Aviva Insurance Limited by way of an insurance business transfer under Part VII of the Financial Services and Markets Act 2000.

The key terms of the agreement remain:

- a 100% cession rate on premiums, claims costs and underwriting expense costs is applied in respect of the underwriting year; and
- a requirement for the Company to retain a percentage in relation to the Financial Services Compensation Scheme levy.

The premiums, claims and expenses which have been reinsured to Aviva Insurance Limited under the arrangement are:

Premiums earned	188,632	210,532
Claims incurred	(79,470)	(88,854)

***2202* Claims Management Costs**

Claims management costs represent indirect overhead costs incurred in respect of maintaining settlement functions. These costs include both charges by third parties and an attribution of the Company's own expenses, such as salaries and related costs of employees. Provision has been made at the year end for all claims management costs to cover the anticipated future costs of negotiating and settling claims which have been incurred, whether reported or not.

***2204* Acquisition Costs**

Acquisition costs represent the fixed and variable costs arising from the conclusion of insurance contracts including direct costs, such as the cost of drawing up the insurance document, and indirect costs, such as advertising costs or the administrative expenses connected with the processing of proposals and the issuing of policies. For business accounted for on an annual basis, a proportion of the related acquisition expenses has been deferred commensurate with the unearned premiums provisions. The acquisition costs deferred have been that proportion of the total acquisition costs, which the unearned premiums provision bears to gross written premiums, by class.

***2205* Unexpired Risks**

Provision is made for unexpired risks when, after taking account of an element of attributable investment income, if necessary, it is anticipated that unearned premiums will be insufficient to cover future claims and expenses on existing contracts. No attributable investment income has needed to be taken into account in either 2014 or 2013.

***3000* Form omitted**

Form 30 has been omitted because all entries would be blank as the business is fully reinsured.

***3200* Form omitted**

Form 32 for category 121 has been included in previous returns but has been omitted this year, on the basis of IPRU (INS) paragraph 9.20(4)(b)(iii).

***3003* Discounting**

An adjustment for discounting has been made in Personal Motor (120) in respect of structured settlements. This is 100% reinsured. The rate of interest used in the discounting calculations is based on risk-free rates, using applicable swap curves for the United Kingdom.
