**Derivative Contracts**

The following summarises investment policy for the use of derivatives:

a) Derivatives will only be used in accordance with guidelines issued by the Prudential Regulation Authority for the purpose of efficient portfolio management or reduction in investment risk. They must not be used for speculative purposes, must be fully covered by the assets of the fund and must not be used to "gear up" a fund.

Futures may be used to implement asset allocation decisions, where this is more efficient than trading in the underlying securities or would avoid disruption to asset allocation strategies.

Forward foreign exchange contracts may be used to manage the impact of currency fluctuations on the balance sheet and to hedge cash flows. A limited number of foreign exchange forward contracts were entered into over the year, for hedging exchange gains and losses from foreign currency investments..

Transactions in financial options may only be undertaken with the prior approval of the Group Derivatives Committee. Their use is limited to balance sheet risk reduction, including the management of the solvency capital surplus. No financial options were entered into during the year.

Except for foreign exchange swaps (referred above), swaps may only be undertaken following the prior approval of the Group Derivatives Committee. Their use is limited to balance sheet risk reduction. No swaps were entered into during the year.

b) There are no specific guidelines for the use of contracts that were not reasonably likely to be exercised at the start of the contract. The speculative use of derivative contracts is prohibited.

c) The Company was not party to any stock underwriting over the financial year, or any other arrangements, which fall into description b) above. Therefore the end of year exposure was nil.

d) No derivative contracts were held during the financial year, which required a significant provision to be made for them under INSPRU 3.2.17R.

e) During the financial year the Company granted no rights under derivative contracts for a fixed consideration.

It is the Company's policy to review all its reinsurance contracts to ensure that they meet the criteria under International Financial Reporting Standard 4 to be classified as insurance contracts.

In carrying out that review the Company has determined that these criteria have been met and there are no contracts where:-

- a) the value placed on future payments in respect of the contract in the return for the financial year is not commensurate with the economic value provided by that contract, after taking account of the level of risk transferred; or
- b) there are terms or foreseeable contingencies (other than the insured event) that have the potential to affect materially the value placed on the contract in the insurer's balance sheet at, or any time after, the end of the financial year.

Financial year ended: **31st December 2015**

**\*1305\* Maximum counterparty limits**

The Company's management of credit risk is carried out in accordance with the Aviva Group credit risk framework. This framework aggregates exposure across all financial assets (investments, cash, broker balances, reinsurance etc.) and a credit limit is set for each counterparty. These limits are set in reference to default probabilities, based on credit ratings of the counterparties, and the type and duration of exposure concerned. Credit ratings are taken from the three main credit rating agencies (S&P, Moody's, Fitch), but overlays may be applied for additional market intelligence. Exposure levels are reported to, and reviewed by, the Aviva Insurance Limited ("AIL") Asset Liability Committee monthly and reported to the AIL Board via the Capital and Liquidity Report at least annually or following significant changes. Additional oversight is provided by Group ALM. Where there is significant exposure to an individual counterparty elsewhere in the Aviva Group, limits may be reduced. If exposures approach or exceed credit limits, these are reviewed and alternate actions considered. In some circumstances breach positions are risk accepted: in these cases the position is reviewed at least annually.

Under the Aviva Group credit risk framework, reinsurance exposures include actual and contingent reinsurance exposure. Reinsurance exposures are monitored at an Aviva Group level as many reinsurance programmes are placed on a Group-wide basis. Limits are managed at a Business Unit level so Ocean Marine exposures are aggregated with other UK&I GI exposure. The Company has a significant exposure to National Indemnity Company, arising from a loss portfolio and adverse development reinsurance agreement entered into in 2000. This was last reviewed and risk accepted by AIL ALCO on 12<sup>th</sup> February 2015 and is due for further review in early 2016.

**\*1501\* Provision for reasonably foreseeable adverse variations**

No adjustment or provision is required in respect of a provision for reasonably foreseeable adverse variations pursuant to GENPRU 1.3.30R to 1.3.33R or INSPRU 3.2.17R to 3.2.18R. Management has considered current market conditions when valuing investments in accordance with IFRS. All derivative contracts are strictly covered and all other obligations to deliver assets or make a payment were felt to be prudently provided for in the accounts.

**\*1502\* Contingent liabilities**

- a. There are no charges over the Company's assets.
- b. No provision has been included in Form 15 for any liabilities to tax on capital gains, which might arise if the Company disposed of its investments. The full potential liability for deferred tax not provided was £nil (2014 - £nil).
- c. There are no contingent liabilities in the Company.
- d. No guarantee, indemnity or other contractual commitment, undertaken other than in the ordinary course of insurance business, exists in respect of related companies.
- e. There are no fundamental uncertainties.

**\*1601\* Exchange rates**

This agreement provides an extra £1 billion of reinsurance cover to protect against circumstances in which the reinsurance with National Indemnity Company is exhausted or otherwise fails to satisfy claims. Details of the agreement are set out on page 92.

**\*2008\* Accounting for certain London insurance market business**

**\*2100\* \*2200\* \*2300\* Forms omitted**

**\*2202\* Claims management costs**

Claims management costs represent indirect overhead costs incurred in respect of maintaining settlement functions. These costs include both charges by third parties and an attribution of the Company's own expenses, such as salaries and related costs of employees. A single payment was made in 2000 to a third party to administer claims handling for the Company. This has resulted in no subsequent claims handling charges being incurred by the Company.

**\*2204\* Acquisition costs**

Acquisition costs represent the fixed and variable costs arising from the conclusion of insurance contracts including direct costs, such as the cost of drawing up the insurance document, and indirect costs, such as advertising costs or the administrative expenses connected with the processing of proposals and the issuing of policies. As the Company has ceased to write new business no acquisition costs have been incurred during the year.

**\*2205\* Unexpired risks**

Provision is made for unexpired risks when, after taking account of an element of attributable investment income, if necessary, it is anticipated that unearned premiums will be insufficient to cover future claims and expenses on existing contracts. No attributable investment income has needed to be taken into account in either 2015 or 2014.

**\*2402\* Adoption of underwriting year accounting**

Underwriting year accounting has been adopted for reporting categories 500 and 600 and elements of categories 270, 340 and 350 prior to 2003. This is due to the longer-term nature of the business written, and the fact that an underwriting result could not be established with sufficient accuracy using the accident year basis.

**\*2407\* Underwriting year business**

The allocation of business to year is determined by the year in which the risk is incepted, except for certain business in reporting categories 340 and 350 where the basis is the year of signing the policy.

**\*3000\* Form omitted**

No Form 30 has been prepared on the basis that these would be blank.

**\*3001\* \*3003\* Discounting**

An adjustment for discounting has been made in the following categories: Commercial Liability (270); Aviation (330); Marine (340); Non-Proportional Treaty Accepted (500); and Proportional Treaty Accepted (600). The risks that have been discounted relate either to US risks or to latent claims.

The average interval to the expected claims settlement date of this portion is 9.7 years. This has been estimated by modelling the settlement patterns in the underlying claims.

The rate of interest used in the discounting calculations is based on risk-free rates, using applicable swap curves for the United Kingdom.

The evidence included that previously obtained by us relating to the audit of the financial statements of the insurer for the financial year. It also included an assessment of the significant estimates and judgements made by the insurer in the preparation of the Forms and the statements.
