SHAREHOLDERS**

**GENERAL ACCIDENT PLC
Unaudited results for the six months ended 30 June 2014**

These results are published for the benefit of preference shareholders of General Accident plc ("the Company") for the six months ended 30 June 2014. The preference shares have remained listed on the London Stock Exchange following the merger of the Company with Commercial Union plc, in June 1998 to form CGU plc ("CGU"), and the subsequent merger of CGU with Norwich Union plc in May 2000 to form Aviva plc (formerly CGNU plc).

The Company transferred its interest in its subsidiaries to its parent company, Aviva plc ("Aviva") in 2005, in return for an inter-company loan with Aviva. The income of the Company for the six months to 30 June 2014 consists of interest received on this loan. The principal risks and uncertainties facing the Company for the remainder of the year are (1) credit risk, as the net asset value of the Company's financial resources is exposed to the potential default on the loans and short terms receivable due from its parent, Aviva plc, and (2) interest rate risk, as the net asset value of the Company's financial resources is exposed to potential fluctuations in interest rates. Exposure to both credit and interest rate risk is managed through the monitoring of several risk measures.

Equity shareholders' funds of the Aviva Group, prepared using accounting policies under IFRS, increased during the period by £593 million from £8,164 million at 31 December 2013 to £8,757 million at 30 June 2014. Operating profit of the Aviva Group at £1,052 million was 7% lower than for the six months to 30 June 2013 (£1,133 million) and net operating cash outflows for the six months to 30 June 2014 were £1,558 million (restated six months to 30 June 2013: £2,553 million inflow).
