SHAREHOLDERS**

**GENERAL ACCIDENT PLC
Unaudited results for the six months ended 30 June 2015**

These results are published for the benefit of preference shareholders of General Accident plc ("the Company") for the six months ended 30 June 2015. The preference shares have remained listed on the London Stock Exchange following the merger of the Company with Commercial Union plc, in June 1998 to form CGU plc ("CGU"), and the subsequent merger of CGU with Norwich Union plc in May 2000 to form Aviva plc (formerly CGNU plc).

The Company transferred its interest in its subsidiaries to its parent company, Aviva plc ("Aviva") in 2005, in return for an inter-company loan with Aviva. The income of the Company for the six months to 30 June 2015 consists of interest received on this loan. The principal risks and uncertainties facing the Company for the remainder of the year are (1) credit risk, as the net asset value of the Company's financial resources is exposed to the potential default on the loans and short term receivables due from its parent, Aviva plc, and (2) interest rate risk, as the net asset value of the Company's financial resources is exposed to potential fluctuations in interest rates. Exposure to both credit and interest rate risk is managed through the monitoring of several risk measures.

Equity shareholders' funds of the Aviva Group, prepared using accounting policies under IFRS, increased during the period by £5,372 million from £10,018 million at 31 December 2014 to £15,390 million at 30 June 2015. Operating profit of the Aviva Group at £1,170 million was 9% higher than for the six months to 30 June 2014 (£1,071 million restated) and net operating cash inflow for the six months to 30 June 2015 were £2,822 million (six months to 30 June 2014: £1,558 million outflow).
